INTRODUCTION

At Da Clean Ride, we believe that keeping your car clean shouldn't mean wasting time, water, or electricity.

We are India's first 15-minute express car cleaning service designed for modern lifestyles — fast, eco-friendly, and completely hassle-free.

Our unique cleaning technology allows us to deliver a showroom-like shine using zero water and no external electricity, making it an ideal solution for homes, offices, apartments, and commercial spaces. Whether it's a quick daily clean or a premium detailing service, Da Clean Ride ensures your car always looks new — without harming the environment.

We are more than just a car cleaning service — we're a movement towards smart, sustainable car care.

Our trained professionals use high-quality, biodegradable cleaning solutions and microfiber techniques to remove dirt, dust, and stains while giving your vehicle a long-lasting shine and protection.

Da Clean Ride combines speed, innovation, and sustainability — bringing professional-grade results to your doorstep in just 15 minutes.

OUR MISSION & VISION

MISSION

To revolutionize the car care industry by offering eco-smart, ultra-fast, and professional car cleaning at the customer's doorstep — ensuring convenience, quality, and sustainability go hand in hand.

We aim to build awareness about waterless technology, encouraging people to choose responsible car cleaning that delivers shine without waste.

VISION

Our vision is to make Da Clean Ride the national leader in green car cleaning solutions, setting new standards in quality, speed, and environmental responsibility. We dream of a future where every car owner in India experiences a premium 15-minute wash without the need for water or electricity. Through this mission, we aim to save millions of liters of water annually, empower thousands of entrepreneurs through our business model, and build India's largest doorstep car cleaning network powered by innovation and eco-friendly technology.
